CHART SERVICES Ltd.
GHANA

COMPANY PROFILE

Chart Services Ghana Ltd is a ship brokerage and consultancy specialized in all types of vessels that support the offshore oil and gas industry.

Headquartered in Ghana, Chart Services Ghana Ltd is well placed to coordinate transactions between Asia and the Americas while being within easy reach of a nucleus in Europe, Africa and the Middle East.

Founded in Ghana in 2020, Chart Services Ghana Ltd provides comprehensive coverage of the global market of offshore support vessels (OSVs).

As a matter of company policy, we are completely independent with no shareholding, agency agreement. As of consequence, we guarantee a totally transparent and impartial service.

In addition to our office in Ghana, we also have representation in London, UK, Perth, Australia and Barcelona, Spain.

OUR UNIQUE TEAM

Our team is a unique blend comprising a number of individuals with prior experience in other related disciplines within the offshore industry such as marine crew, marine logistics, ships agency and ship managers. As a result, we offer a rich degree of knowledge and experience.

OUR SERVICES

We provide a comprehensive single source solution for the provision of OSVs, Rigs and Barges worldwide for spot charters through to multi-year projects that may require custom-built tonnage.

Our knowledge of marine contracting enables us to assist our clients navigate the often treacherous course of vessel chartering.

Rather than costing money, we are able to obtain significant savings to charterers by maximizing choice, optimizing their negotiating position and empowering them with pertinent market information on a highly dynamic and competitive global market.

The principle service we provide is our Integrated Tendering Service (ITS). In a nutshell, we undertake the tendering process on behalf of our clients. We carry out the process under the supervision of our Principals, tailoring each project to our client's particular needs.

We also provide Visa on Arrival and Work Permit Application services, travelling arrangements and Meets and Greets.

We assist in this process with three key tools:

CHARTSHIP (Offshore vessel, rig and barge database)

Since its inception, Chart has maintained a bespoke database, CHARTSHIP, listing the world's fleet of support vessels (currently over 10,000 units). The database is updated on a continual basis, which ensures we give our clients 100% coverage of the global boat market. We augment this with subscription to AIS tracking vessel databases.

CHARTBID (Internet bidding portal)

Most addition to our suite of chartering tools, CHARTBID is our bespoke, highly intuitive and user-friendly system with all communication channeled through the web interface, ensuring 100% confidentiality and 100% transparency of the entire bidding process.

TENDER BASE (Tender evaluation software)

This software programme assist us with our tender evaluations.

Our TENDERBASE automates most of the evaluation in an extremely rapid and accurate way. In addition to our ITS we also serve our clients with the following:

Chandlery Services

Chart Services Ghana Ltd are very pleased to offer you our chandlery and bunkering services. Our parent company Aquatec has been chandlery for the two deep sea tugs we owned and also agency support we gave to clients in our past. We have had years of experience in supplying vessels with whatever need they require: spares on arrival, lube oils and bunkers.

In Chart Services Ghana Ltd, we are happy to continue with this service with which we have had many years of experience at.

Spot Charter

We are available 24 hours a day all year round for short term and/or urgent spot requirements worldwide. For certain regions, we produce regular spot availability lists, but can provide such reports for other regions upon request.

Sublet

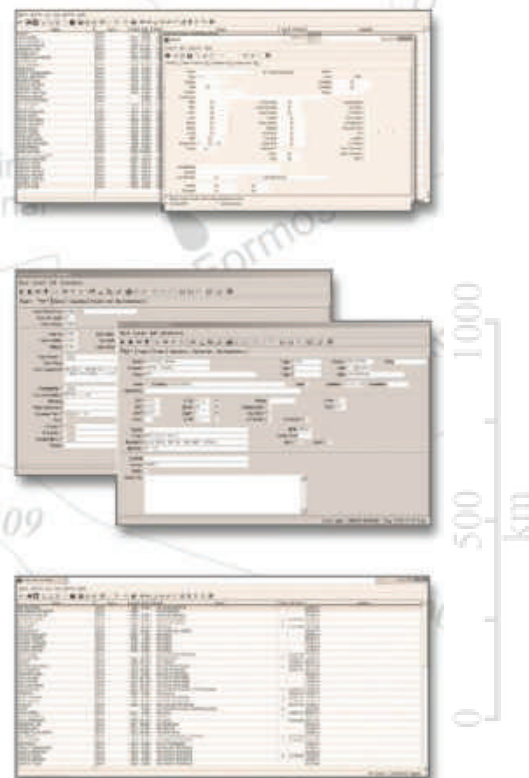

Where our clients have fallow time on any vessels they have on term contract, we endeavor to mitigate their costs by finding sub-let opportunities through our extensive network of charterers. We act as a hub for the sublet of time-chartered vessels among operators.

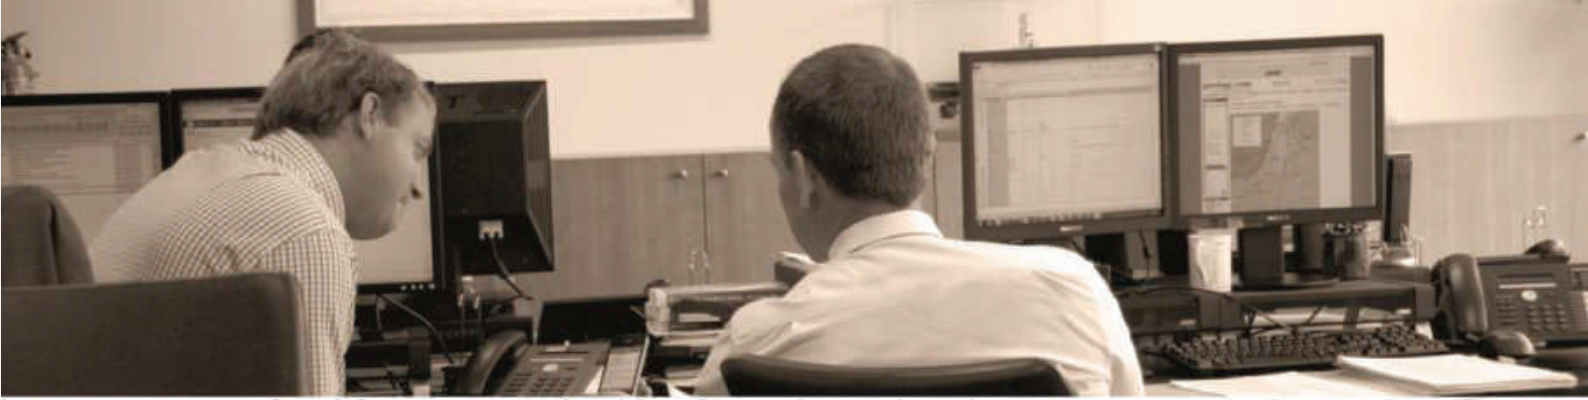

Bespoke reports/services

In addition to a number of weekly and monthly publications, we produce various market reports and studies by special arrangement.

Budgetary Prices

As part of our service, we assist charterers in the planning of their budgets by providing indicative prices and availability of vessels for long-range projects.
